Saber DAMS

SENIOR BACKEND ENGINEER · GOLANG · CLOUD-NATIVE

Colombes, France (92700) +33 6 98 17 71 28 saber_dams@live.com linkedin.com/in/saber-dams

PROFILE

Senior Backend Engineer with **8+ years of experience** designing and scaling distributed systems, microservices architectures and high-throughput data pipelines. Go-to stack: **Golang, GCP, AWS and Kubernetes**, instrumented end-to-end with **OpenTelemetry** — battle-tested in production on high-traffic systems. Proven track record of leading architectural redesigns, mentoring engineering teams and owning technical decisions from concept to production.

EXPERIENCE

Senior Backend Engineer

Heex Technologies · Paris, France Jan 2024 — Present

- Spearheaded a full **backend architectural redesign** — migrating from a monolith to a scalable microservices platform with Golang, MongoDB, Kubernetes & ArgoCD.
- Championed **Domain-Driven Design (DDD)** as the team standard, improving codebase clarity and developer onboarding.
- Built and operated cloud workloads on **AWS**, with Kubernetes deployments orchestrated via ArgoCD across multiple environments.
- Implemented end-to-end observability with **OpenTelemetry** across all services — distributed tracing, metrics and structured logs feeding into central dashboards.
- Built an internal **Golang agent** orchestrating calls to **MCP** (Model Context Protocol) tools — agentic LLM workflows that automate code generation, refactoring and engineering tasks across the codebase.
- Defined GitLab CI/CD strategy and **GraphQL / gRPC / REST** API contracts — enabling **zero-downtime deployments** and maintaining **99.9% uptime**.

Golang AWS Kubernetes ArgoCD OpenTelemetry GraphQL
gRPC MCP DDD

Golang Tech Lead

Blink · Paris, France Mar 2022 — Dec 2024

- Owned the technical roadmap for **multiple concurrent backend projects**, balancing delivery pace with code quality and scalability.
- Mentored **4+ engineers** through structured code reviews, pair programming and best-practice documentation.
- Enforced Go standards for scalable, testable and maintainable code — **reducing production incidents**.
- Coordinated with external partners and cross-functional teams to design and ship critical product features on time.

Golang Tech Leadership Mentoring Code Review

CORE SKILLS

BACKEND LANGUAGES

Golang Node.js PHP
Java

CLOUD & INFRASTRUCTURE

GCP AWS Kubernetes
GKE Cloud Run ArgoCD
Terraform Docker

DATA & MESSAGING

MongoDB PostgreSQL
BigQuery Kafka PubSub
Apache Beam Dataflow

APIS & ARCHITECTURE

Microservices DDD TDD
REST gRPC GraphQL

OBSERVABILITY & CI/CD

OpenTelemetry GitLab CI/CD
Jira

AI FOR CODING

MCP AI-assisted coding

MOBILE

Android iOS Swift

Fishing

Backend Developer

Blink · Paris, France

Feb 2018 — Feb 2022

- ▶ Designed and deployed **Golang microservices on GCP** (GKE, Cloud Run, PubSub, BigQuery), handling millions of ad impressions daily.
- ▶ Built custom real-time data pipelines with **Apache Beam / Google Dataflow**, powering large-scale advertising analytics.
- ▶ Developed REST APIs in Go, Node.js and Yii; integrated with third-party ad networks and DSPs.
- ▶ Engineered native advertising SDKs for **Android and iOS**, fully deployed to production.
- ▶ Designed and maintained **GitLab CI/CD pipelines** for zero-downtime deployments.

GCP

Apache Beam

Android · iOS

CI/CD

Mobile Developer

Mobvalue · Paris, France

Dec 2015 — Feb 2018

- ▶ Built and maintained production-grade mobile applications for Android and iOS (Java / Swift).
- ▶ Collaborated with product teams to translate business requirements into reliable mobile features.
